

WHEN YOU PUT PATIENTS' HEALTH FIRST,  
REMARKABLE THINGS FOLLOW

At Frankenman, we believe we're not so much in the business of making instruments but in the business of making surgeries more successful.

That's why we listen to doctors who've put our instruments to use. We read their reports. We invite them to think with us, to brainstorm, to help us develop new and innovative ideas.

That way we know we will be able to deliver the highest quality products to the medical profession both today and way into the future.

State-of-the-art manufacturing facilities.

CS COMPACT™  
SHORT STRAIGHT  
CIRCULAR STAPLER

# A RANGE OF CIRCULAR STAPLERS FOCUSED ON MAKING RECTAL ANASTOMOSIS EASIER

The Chex CS COMPACT™ range was developed in collaboration with one of the world's leading Specialist centres in Colon and Rectal Surgery. The resultant range of circular staplers creates devices that make anastomosis of the rectum easier.

The surgeons wanted more control of the surgical stapler, they wanted a more stable device, particularly when firing. They wanted more 'feel' and felt that simply shortening the working length of a conventional straight circular stapler would give him that control... we responded and they were right.

The CS COMPACT™ is a SHORT-STRAIGHT Circular Stapler 345mm long, that in many Low and especially Ultra-Low Anterior resections will feel right for you.

We listened.

## KEY FEATURES

- 1 OVERALL WORKING LENGTH REDUCED TO 345MM.
- 2 AVAILABLE IN TWO CONFIGURATIONS... CS COMPACT™ AND CS COMPACT™ EA.
- 3 SMOOTH ERGONOMIC AND ATRAUMATIC INSERTION TUBE.
- 4 STAPLE COMPRESSION GAUGE TO ENSURE ACCURATE STAPLE FORMATION TO SUIT VARIABLE TISSUE THICKNESSES.
- 5 'WING NUT' TO ASSIST CONTROL AND DEXTERITY WHEN OPENING AND CLOSING ANVIL.

## THE CS COMPACT™

DESIGNED FOR RECTAL ANASTOMOSIS BUT FINDING APPLICATIONS WHERE CONTROL, STABILITY AND ACCESS ARE CRITICAL.

### Features and Benefits:

- Short-Straight shaft.
- Assists in accurate positioning of the stapler within the rectum and eliminates potential pressure points created by curved configuration.
- Alignment of rectum, shaft and firing mechanisms reduces potential for distal end movement during firing.
- Ideally suited for Ultra-low sphincter saving techniques where control and feel are most critical such as APPEAR.
